## **1. Introduction**

## **1.1 About your proposal**

All documentation relative to the call is provided on the following LEAP-SE website page: <u>LEAP-SE COFUND - LEAP-RE</u>

Prior to submission, the project coordinator must prepare a **project proposal document**, to be submitted in PDF format document following the template available on the call page<sup>1</sup>.

Some agencies require additional documents (check on appendix IV) to be included in the submission documents for the international submission. Please make sure that you and your partners check the appendices of your corresponding agencies regarding additional documents, in order to ensure the acceptability of your proposal. The templates of these documents are available on the call page.

Keep in mind that each funding organization has its own funding criteria and regulations, which are mentioned in the call announcement.

## **1.2 About the submission system**

The LEAP-SE Call 2025 electronic submission system is based on the French National Research Agency (ANR) electronic submission platform (<u>L'Agence</u> <u>nationale de la recherche</u>). The present document is designed to guide you through the submission process and ensure a smooth submission.

→ Note that some features of the submission platform are not used for this call and that some fields in the interface can be safely ignored.

Each modified page in the submission platform must be saved (using the "Save" button) before going to another page.

### **1.3** Roles in the submission process

A consortium is made up of project partners, each represented by a Lead Researcher (referred to as the Principal Investigator on the submission website). The project coordinator is responsible for creating the proposal in the submission system and adding the other project partners. Once added, the partner PIs receive an automatic email notification. This email invites them to log into the system to review, complete, or modify the information provided by the coordinator regarding the consortium.

The coordinator is responsible for ensuring that all partner information is accurate and complete. Once the proposal is finalized, the coordinator can "lock" it, which prevents other partners from making any further updates. Only the coordinator is permitted to modify the overall project information.
